robart Rlock

THE NEW GENERATION OF RC HUBS

Rlock uses Patent Pending technology to develop spare parts and accessories for the model car and truck industry.

All of our parts are cut from American Sourced billet aluminium and steel and are 100% American Made

At Robart, we set the standard for quality manufactured parts.

AMERICAN MADE

SINCE 1971

Who We Are

Origins

Founded in 1971, robart manufacturing began as the leader in design and manufacturing of landing gears and accessories for model airplanes ranging from a few hundred dollars to \$10k+.

Growth

With majority of our competitors using overseas manufacturing, we expanded our in-house capabilities to bring more manufacturing state-side improving quality and overall accessibility.

With the additional machining, robart has carved out a place in the manufacturing world and has expanded its capabilities to include everything from prototyping to quickly becoming a leader in Thermoforming Molds manufacturing, and everything in-between.

Above and Beyond

We continue to create and support our core beliefs and value by domestically sourcing all our raw materials while we continue to serve vast manufacturing industry.

Our Services

C.N.C. Machining

Robart Manufacturing highly skilled machinists are skilled in turning with live tooling, 4 axis machining and much more to ensure your project is accurate and within your specifications.

Engineering

Our engineers are machinist first giving them hands on experience on how a product is manufactured. This experience allows our team to design a product with precision accuracy and ingenuity.

Prototyping

With rapid Prototyping, the Product Managers at Robart Mfg., can help create your product from inception through production and make sure every detail is met along the way.
